Correction to: *Nature* <https://doi.org/10.1038/nature21076>, published online 13 February 2017.

In Fig. 3c of this Letter, the effects of CRISPR–Cas9-mediated deletion of *NR3C1*, *TXNIP* and *CNR2* in patient-derived B-lineage leukaemia cells were shown. For curves depicting *NR3C1* (left graph), data for *TXNIP* (middle graph) were inadvertently plotted. This figure has been corrected online, and the original Fig. 3c is shown as Supplementary Information to this Amendment for transparency. The error does not affect the conclusions of the Letter. In addition, Source Data files have been added for the Figs. 1–4 and Extended Data Figs. 1–10 of the original Letter.

Supplementary information is available at <https://doi.org/10.1038/s41586-018-0164-5>.
