Errata

THE illustrations and legends in the article "Preferential Sensitization of Hypoxic Cells to Radiation *in vivo*" by J. Denekamp and B. D. Michael (*Nature New Biology*, **239**, 21; 1972) were unfortunately incorrect. The correct versions of Figs. 1 and 2 appear here.

Fig. 1 Survival of epidermal clones as a function of the test dose administered to animals breathing oxygen or nitrogen, with or without intravenous administration of NDPP (CRC 55, Ro 3-6156). The vertical bars are 95% confidence limits based on the sample size.

●, Oxygen; △, 1 mg NDPP+oxygen; ×, 1 mg NDPP+ nitrogen; □, 3 mg NDPP+ nitrogen; ○, nitrogen.

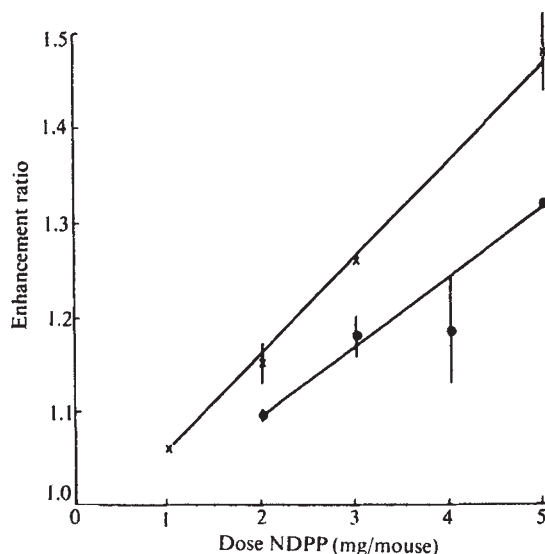

Fig. 2 Enhancement ratio for the survival of epidermal clones in nitrogen-breathing animals as a function of the dose of NDPP (CRC 55, Ro 3-6156) administered intravenously. ×, WH mice; ●, C₃H mice.

IN the article "LRF and CRF Release in Subcellular Fractions of Bovine Median Eminence" by G. Fink, G. C. Smith, J. Tibballs and V. W. K. Lee (*Nature New Biology*, **239**, 57; 1972), the legend to Fig. 3 should read: Electron micrograph of fraction P3D showing a structure (S) which contains numerous agranular vesicles. This structure is presumed to be a disrupted nerve terminal. Profiles resembling granular vesicles are seen nearby (arrow).

THE following corrections should be made to the article "Homology between RNA from Human Malignant Breast Tissue and DNA synthesized by Milk Particles" by M. R. Das, E. Sadasivan, R. Koshy, A. B. Vaidya and Satyavati M. Sirsat (*Nature New Biology*, **239**, 92; 1972): on page 92, paragraph 2, line 1, Parsi should read Parsi; in the legend to Fig. 1, line 1, 250 ml. should read 250 µl.; in the legend to Table 1, line 4, 50 aliquots should read 50 µl. aliquots; in the legend to Table 2, line 1, 500-600 g should read 500-600 µg; and on page 94, line 8 of column 2 should read "RNA AC 12928 and DNA product from milk sample H9".
