

## Endless possibilities

Clark Dental is delighted to offer the XIOS XG Supreme from Dentsply Sirona.

This industry-leading solution facilitates optimal patient care, delivering outstanding clarity and quality with every image, minus the additional wait time of scan or developing processes. With three sensor sizes, three cable lengths and USB or WiFi connectivity, you can adapt the sensors to suit your individual needs for the practice. This also enables the XIOS XG Supreme to be integrated with your treatment centre, helping you harness the concept of complete chairside dentistry.

Additionally, this high-grade sensor offers image enlargement functions for

various indications, such as general dentistry, caries diagnostics, endodontics and periodontology.

If you'd like to find out more about Clark Dental's solutions, call the team on 01268 733 146, email [info@clarkdental.co.uk](mailto:info@clarkdental.co.uk) or visit [www.clarkdental.co.uk](http://www.clarkdental.co.uk).

## A bridge to the future

Carestream Dental is excited to announce the newest optional add on cloud-based software for R4+, Patient Bridge.

Patient Bridge gives clinicians a taster of cloud-based software capabilities. This optional add-on service seamlessly blends with existing R4+ software and allows you to centralise all your patient communications in one area. Through anytime, anywhere access, you can view patient lists

and appointments, send

communications and see your patients' contact information – ideal for when you

don't have access to your practice server. Most exciting is the virtual waiting room for your patients, helping you to streamline service and better connect to their individual needs with features such as contactless check-in, digital form completion and more.

Additionally, Patient Bridge gives you the ability to increase patient engagement with managed marketing campaigns to boost private revenue for the practice. It also supports GDPR management of opt-outs so that your communications remain compliant. Finally, patient surveys can be automated and the information presented through dashboards allowing you to track and discuss feedback with the team.

To find out more contact Carestream Dental on 0800 169 9692.

## Patients prefer it!

A clean mouth is not only crucial for oral health but for overall health in general. That's why finding ways to remove microbial dental plaque (biofilm) effectively is key to patient wellbeing.

In a global survey of 76,000 patients to determine the preferred method for professional prophylaxis, 92% said they were enthusiastic about EMS's Guided Biofilm Therapy (GBT) method and would recommend it to family and friends. The questionnaires consisted of eight

questions, including the overall assessment of GBT, the surface smoothness achieved, the usefulness of disclosure before starting the treatment and a direct comparison with the conventional method. GBT achieved very good results in all the questions illustrated, scoring 4.6 or 4.7 out of a possible five points in each case.

For further information about EMS's GBT, [www.ems-dental.com/en/guided-biofilm-therapy](http://www.ems-dental.com/en/guided-biofilm-therapy)

## Implant training from an industry leader

With fully accredited training from The One to One Implant Education, you will go from novice to implant dentist.

Course lead Dr Fazeela Khan-Osborne, a renowned implant dentist, mentors many of the industry's leading lights. A substantial portion of teaching time is dedicated to live surgery, to give you valuable hands-on and theoretical learning.

When you can place and restore dental implants, you can accept referrals and bring in more revenue, also elevate your general dentistry and widen your network.

To reserve your place or to find out more visit <https://121implanteducation.co.uk> or call 020 7486 0000.

## Building the dream team

To meet the demands and expectations of a wide range of patients, it's important to build a diverse and talented team. In many situations, it can be faster and more efficient to extend your team with the help of a referral centre – we're here to help at Lodge Dental. We have an exceptionally dedicated, highly skilled team of clinicians that can provide various treatments by referral when you need us. Our dedicated Referrals Manager also ensures a seamless service from start to finish. Get total peace of mind when referring your patient to our expert team and state-of-the-art facility.

The result is excellent treatment outcomes and happy patients.

To work with Lodge Dental, contact Jo on 01873 854711 or [referrals@lodgedental.co.uk](mailto:referrals@lodgedental.co.uk), or visit [lodgedental.co.uk/referrals](http://lodgedental.co.uk/referrals).
