

EXCELLENT FLOW CHARACTERISTICS

GC Gradia is a high strength micro-hybrid composite system which is bright, translucent and warm in the oral environment, so that inlays, veneers, crowns and bridges are remarkably lifelike in appearance and have superb physical properties.

GC have also developed a light cured composite for the highly aesthetic reproduction of missing gingival tissue. GC Gradia Gum is indicated specifically for implant superstructures and other fixed or removable prostheses.

GC Gradia Gum enables the clinician to reproduce an unlimited range of natural gingival shades, as the layering technique combined with a variety of modifiers provides endless possibilities.

GC FitChecker II is the ideal material to check the fit of your crowns, bridges and dentures. This A-silicone has excellent flow characteristics enabling minute surface detail to be recorded. The clinician can easily identify even subtle misfittings according to the tone and translucency of the set FitChecker II, which has a film thickness of just 15 microns.

ACHIEVE ESSENTIAL IMPLANT CONDITIONS

The Straumann Dental Implant System has been developed to offer treatment flexibility, so you can use the same surgical kit, prosthetic kit and procedure whichever Straumann Implant is required by the clinical situation.

The essential conditions required for implant dentistry can successfully be achieved with Straumann's range

of regenerative products, providing dentists with solutions for true soft and hard tissue regeneration that are backed by scientific evidence.

Straumann's product portfolio now also includes digital solutions in addition to dental implants and oral tissue regeneration. Straumann CARES Digital Solutions encompasses state of the art computer-guided surgery, intraoral scanning and CAD/CAM prosthetics.

CQC COMPLIANCE ALLEVIATED

CODE can ensure that your dental practice establishes a good relationship with the Care Quality Commission (CQC). CODE offers:

- Self-setup for compliance: CODE membership and Clinical Governance Made Simple give all practice owners the tools they need to set up necessary policies, audits and risk assessments
- Assure Level 1 'Health Check for Compliance' – a one-day site visit from a CODE Assure consultant to review your compliance and check the availability of evidence to support this. The consultant will provide an action plan to help you achieve compliance in each area. Includes

an extra half a day of support by telephone, fax and email

- Assure Level 2 'Total Support with Handholding' – a CODE consultant will spend 2.5 days in the practice to help set up the procedures, risk assessments, policies and action plans you need to achieve compliance. Clinicians will have an additional day of support by telephone, fax and email.

Assure Level 3 'CODE Accreditation' – this award will demonstrate the practice's adherence to essential regulations along with additional patient care standards from CODE. The service includes ongoing 'health checks' and support.

DENTAL PRACTICE SOFTWARE SOLUTIONS

The Appointmentor Online Booking System is a product offered by Welltime Ltd, a software solutions development company. The Booking System is practice-controlled and patient-focused, allowing permitted appointment booking 24/7, making life easier for patients and reducing work and stress for reception staff.

The PatientConnections solution assists in creating branded experiences for patients, helps practices comply with CQC and achieve effective marketing using social media.

PatientConnections has a facility for automated feedback surveys, educational links and product recommendations, promoting the practice's own offers and helping with search engine rankings. For busy practices, InfoPort Self Check-in Kiosks allow patients to automatically check-in.

UNISEX SCRUB TUNICS

Grahame Gardner has introduced a new unisex scrub tunic in their latest brochure. The SS3295 complements the existing range but boasts several design features to make it stand out.

The SS3295 has a v-style neck complemented by the v-detail on the sleeves and has contrasting trim available on the neck, sleeve and pocket. Stocked in navy, blue 18 and bottle green this tunic should be popular with professionals who prefer a more relaxed approach to uniforms.

Grahame Gardner also offer Urbane scrubs, developed specifically for women and Easiephit, a unisex range with a bold colour palette.
