

Layering composites just got easier

Known for their expertise in creating reliable and innovative materials, GC UK present their NEW GC Modeling Liquid and brushes which means layering composites just got easier!

Direct composites can be tricky – they sometimes stick to instruments, can be difficult to shape or smoothen just the way the clinician wants and at times the final restorations end up with visible margin lines.

Using a brush and modelling resin is a real game changer. Using a brush wetted with a modelling liquid makes composites less sticky, resulting in easier and faster application and shaping. Applying the final layer of composites using a wetted brush also enables the clinician to smoothen it efficiently and to achieve a very nice surface. This simplifies the finishing procedure and saves valuable time.

GC Modeling Liquid offers optimal low viscosity, is completely invisible after light-curing for optimal aesthetic results, very

simple and time-saving to use, compatible with all direct composite materials, can be stored at room temperature, and one bottle will last for up to 350 restorations.

Suitable for use on both anterior and posterior restorations, GC Modeling Liquid and brushes are supplied in a kit containing

6 ml Modeling Liquid, 5 × Gradia Flat Brushes, 5 × Gradia Round Brushes, 2 × Gradia Brush Holders and a mixing pad. Refills of all the components are available separately.

For further information contact GC UK Ltd on 01908 218999, email info@gcukltd.co.uk or visit www.gceurope.com.

An unparalleled digital experience

The Digital Symposium 2018 takes place on 27-28 April in London and this year it's thinking big, it's thinking holistically and it's thinking differently.

Recognised as *Dental Industry Event of the Year* at the Dental Industry Awards 2017, the Digital Symposium offers an unparalleled digital experience for dental professionals.

self-confessed 'geek physician' with a PhD in genomics and an acclaimed author, who will challenge the audience with his predictions on the impact digital health technologies will have on the future of healthcare.

The Medical Futurist is joined by a first-class line-up of speakers including Colin Campbell, Rune Fisker, Sinead McEnhill, Adam Nulty, Josef Kunkela, as well as renowned technicians Petr Hajny and Vicken Hatsakordzian, and many more.

Featuring two days of high quality lectures and hands-on workshops led by digital experts at the top of their profession, the Digital Symposium is a must-attend event for those just starting on their digital journey to the most experienced professionals who are already realising the many benefits of an integrated digital workflow.

The Henry Schein Digital Symposium is taking place at the Park Plaza London Riverbank Hotel on 27-28 April 2018. For more information or to register visit hsddigitalsymposium.co.uk, call the events team on 01634 877 599 or email vhdsdigitalsymposium@henryschein.co.uk. Rewards members get a £25 discount. Flexible new plans

After 110 years and building on its history of success, Dentists' Provident is proud to continue its tradition of listening to the demands of the market and the needs of the profession by launching a new range of innovative plans.

Their membership, targeting dentists, hygienists, therapists and technicians, now offers one of the most comprehensive and competitive package of benefits in the market. All plans meet Defaqto 4 and 5 start ratings and at the same time reflect the ethos of the organisation with flexibility, supported by an empathetic and member focused approach.

Dentists' Provident has worked closely with the profession in building their new plans from the ground up. One of their main objectives was that the offering should be sufficiently flexible to meet dental professionals' diverse needs as they go through their careers and beyond. They are confident that they have achieved this.

There is also a new Dentists' Provident website and member portal that allows an easier and faster servicing of the plans, obtaining quotes and managing membership benefits.

www.dentistsprovident.co.uk

Driving innovative solutions in areas such as predictive treatment, diagnosis, management, treatment and prevention, the Digital Symposium is an opportunity to witness the transformative power of these emerging technologies first hand and hear from some of the industry's most influential educational and motivational speakers.

This year's Keynote speaker is The Medical Futurist Dr Bertalan Mesko, a
