

Zhejiang University

SEEKING THE TRUTH AND PIONEERING NEW TRAILS

Zhejiang University (ZJU), one of the leading research-intensive universities in China, is located in the beautiful city of Hangzhou. Research at ZJU spans 12 academic disciplines: philosophy, economics, law, education, literature, history, art, science, engineering, agriculture, medicine and management. Of the 22 subjects listed in Thomason Reuters Essential Science Indicators, ZJU is rated in the top 1% in the world for 17.

As a national university, ZJU is building itself into an innovative and comprehensive research institution of world-class standing. ZJU seeks the truth and pioneers new trails. It is dedicated to creating and disseminating knowledge, advancing civilization, serving and leading society, and promoting national prosperity, social development and human progress.

ZJU sincerely invites talents to join it so that together we can create a glorious future.

Why did you choose Zhejiang University?

"Zhejiang University acts as a bridge to the exciting and fast-growing Chinese market. It allows researchers to harvest real-life problems and provides abundant

opportunities for applying research outcomes to real systems. Besides providing opportunities to work with the best students in China, Zhejiang also has an excellent research environment that nurtures world-class research."

Professor Wen Yuan Xu, College of Electrical Engineering

"For a young researcher, China is a fascinating country to begin an independent career. The creativity and pace of modernization will impress everyone who visits,

and having a position here gives you the opportunity to focus on what really matters: research and the education of a new generation of scientists. Zhejiang University is one of the top universities in China and provides starting faculty with excellent working conditions.

The Department of Chemistry supports its young professors wherever it can, gives them much freedom and welcomes interdisciplinary collaboration. I am happy to have brilliant and helpful colleagues as well as smart, hard-working students."

Research Professor Simon Duttwyler, Department of Chemistry

"I decided to return to China in 2009 after working abroad for 15 years as I believe that China is the best place to find sustainable devel-

opment solutions to address our planet's limited resources. Indeed, the Yangtze River Delta, where Zhejiang University is located, is an area that has prospered continuously for thousands of years without major environmental decay. In particular, I enjoy the freedom to pursue my area of interest as a researcher and the open-minded atmosphere at Zhejiang University."

Professor Xiaogang Peng, Department of Chemistry

"As a former PhD student at Zhejiang University, I have always valued its strong support network, so after doing two postdoc programmes

here, when the opportunity came for me to stay and teach, I took it without hesitation. I am proud to be on the faculty of the College of Agriculture and Biotechnology and I feel like I can never repay my alma mater for transforming me from a young boy into the quality teacher that I am today."

Lecturer Imran Haider Shamsi (Ying Lan), Department of Agronomy

"Zhejiang University's location in the economically dynamic region of the Yangtze River Delta provided much opportunity for translational research and

a large patient base for biomedical research."

Professor Lanjuan Li, Director of the State Key Laboratory for Infectious Diseases Diagnosis and Treatment

"Although I officially joined Zhejiang University in 2011, I have been collaborating with researchers at Zhejiang University since 2002. I have found it to be a place with

great academic freedom, and I believe that's the reason why Zhejiang University is one the best universities in China. In addition, I am grateful to be able to work in the beautiful city of Hangzhou, where I grew up. Zhejiang University is also strong in engineering, which provides a fantastic platform for physical science research and interdisciplinary collaboration — activities that are of particular importance to me."

Professor Fuchun Zhang, Department of Physics
